

1. Observe the following 30-60 Triangle, with only one side given, then determine the other two sides.

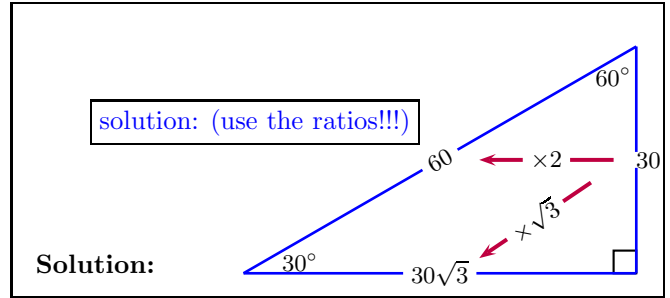

2. Observe the following 30-60 Triangle, with only one side given, then determine the other two sides.

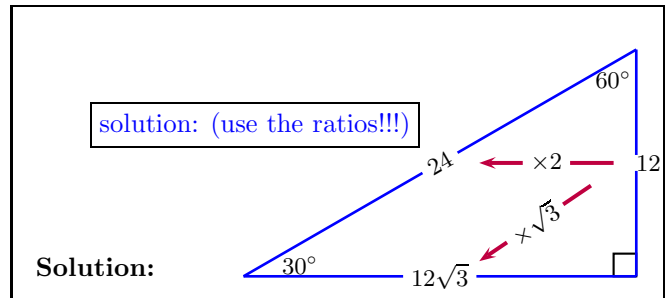

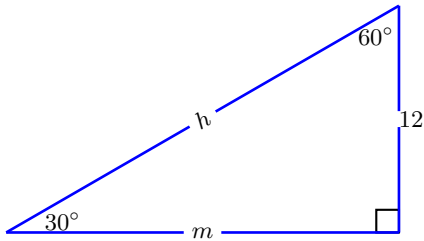

3. Observe the following 30-60 Triangle, with only one side given, then determine the other two sides.

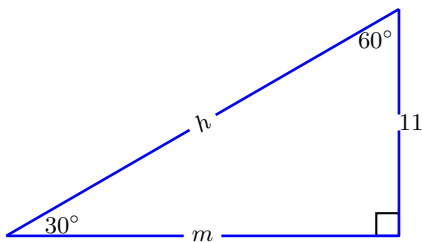

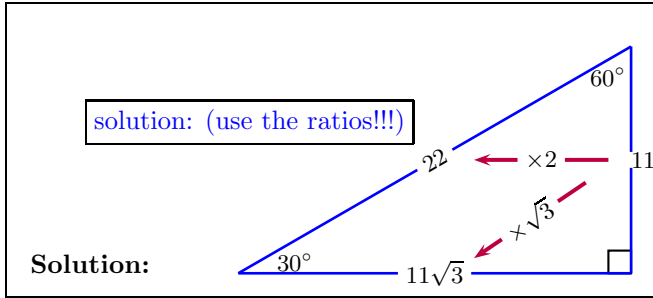

4. Observe the following 30-60 Triangle, with only one side given, then determine the other two sides.

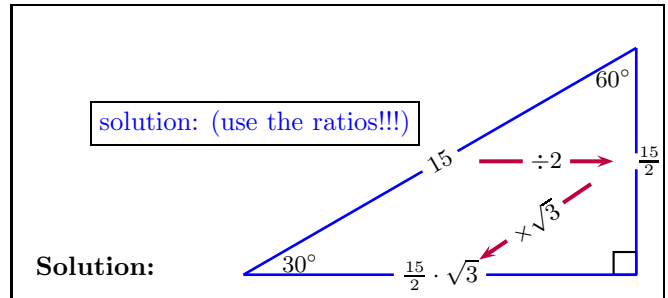

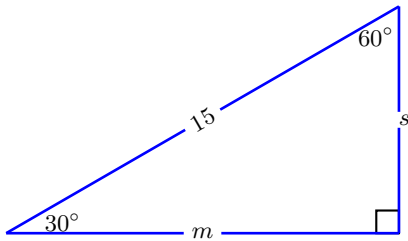

5. Observe the following 30-60 Triangle, with only one side given, then determine the other two sides.

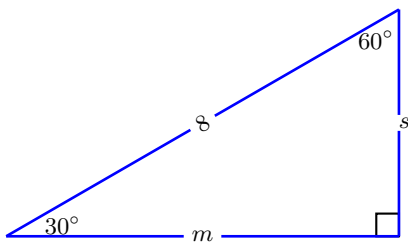

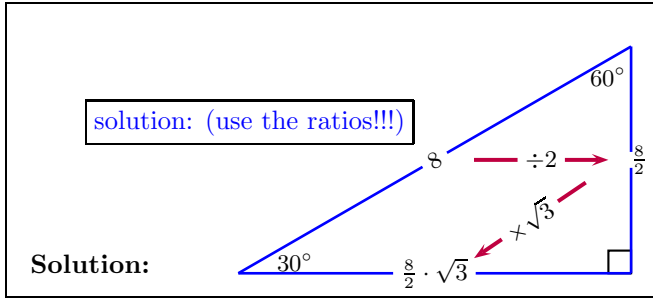

6. Observe the following 30-60 Triangle, with only one side given, then determine the other two sides.

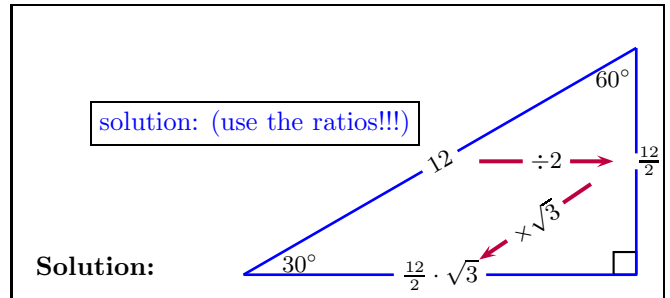

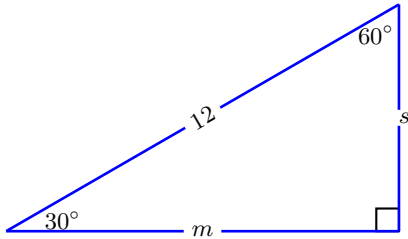

7. Observe the following 30-60 Triangle, with only one side given, then determine the other two sides.

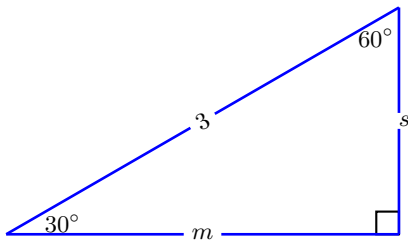

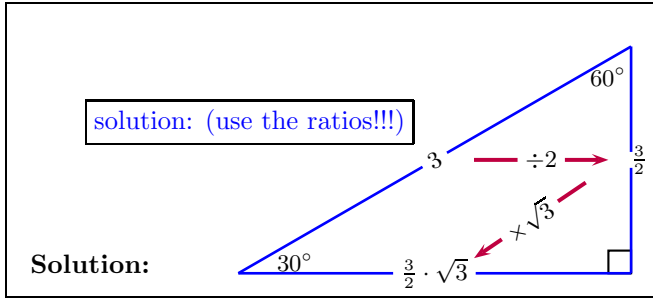

8. Observer the following 30-60 Triangle, with only one side given, then determine the other two sides.

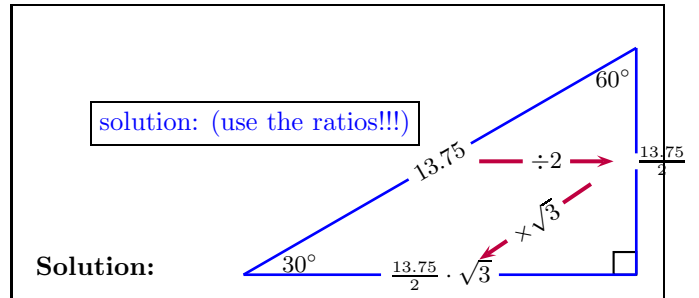

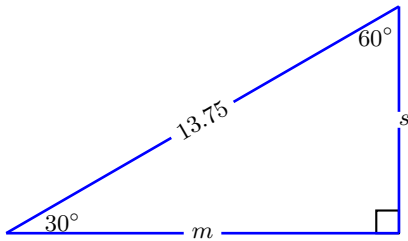

9. Observer the following 30-60 Triangle, with only one side given, then determine the other two sides.

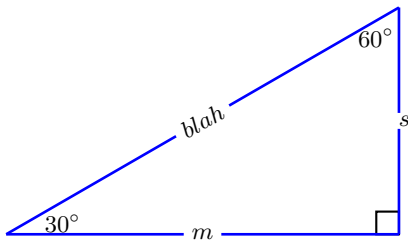

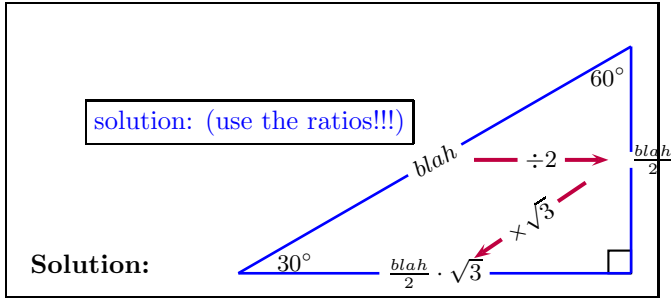

10. Observer the following 30-60 Triangle, with only one side given, then determine the other two sides.

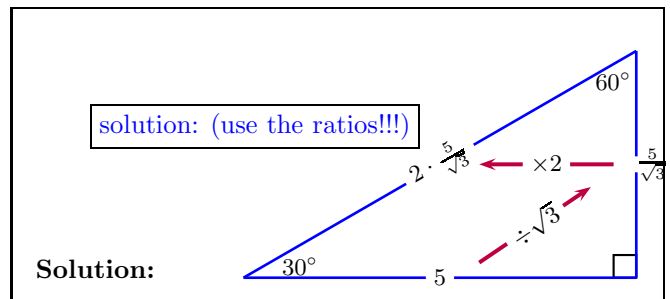

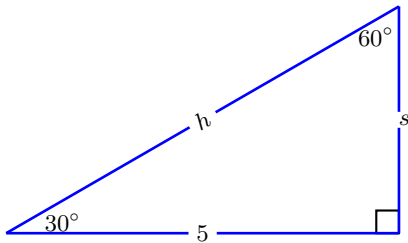

11. Observer the following 30-60 Triangle, with only one side given, then determine the other two sides.

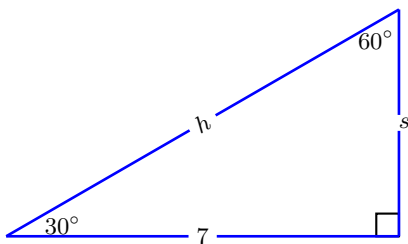

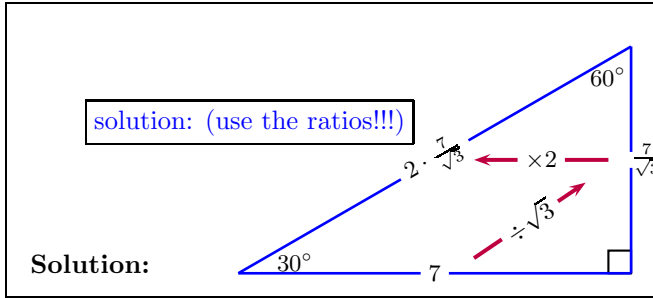

12. Observe the following 30-60 Triangle, with only one side given, then determine the other two sides.

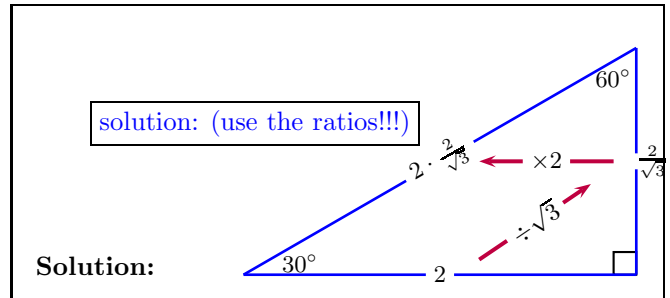

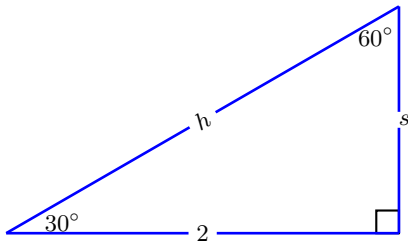

13. Observe the following 30-60 Triangle, with only one side given, then determine the other two sides.

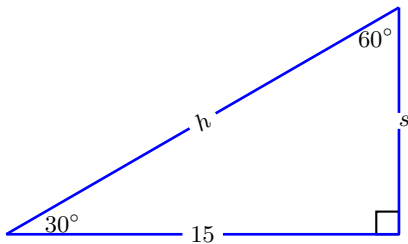

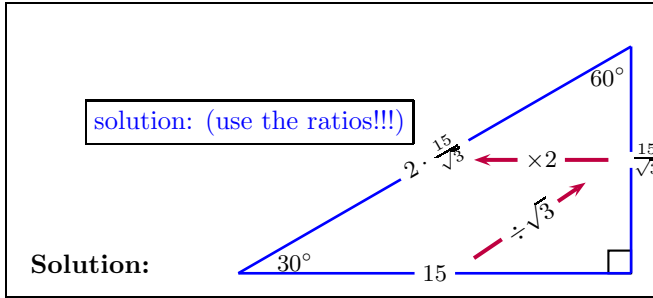

14. Observer the following 30-60 Triangle, with only one side given, then determine the other two sides.

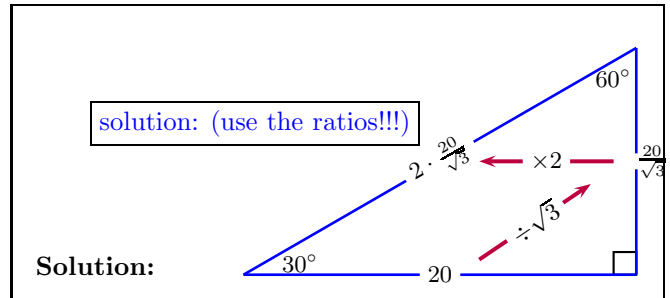

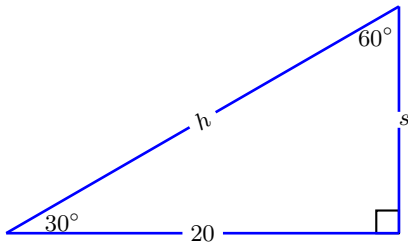

15. Observer the following 30-60 Triangle, with only one side given, then determine the other two sides.

16. Observer the following 30-60 Triangle, with only one side given, then determine the other two sides.

17. Observer the following 30-60 Triangle, with only one side given, then determine the other two sides.
